

MKF-JS18

Mate Industrial Joystick, Hall effect, Single axis, Panel Mounted

DESCRIPTION

MKF-JS18 is a single-axis joystick. One of the main accessory of the video switcher product. Adopting German imported Hall sensor, full temperature range linear compensation, multi-point linearity correction, moving parts and sensor non-contact, long life, advanced structural design and imported damping materials, with good hand feeling, widely used in broadcasting In terms of TV products.

SPECIFICATION

Button	0
Axis	Single axis
Positioning	Friction resistance positioning
Operation range	±38 degrees
Power Supply	DC5V
Signal Output	Analog voltage 0-5V
Life Span	10 million operating cycles
Material	Anodised aluminium
Degree of protection	IP54
Operation Temperature	-40°C to +70°C
