

MKF-CZT01

MATE Crane Driver's Seat

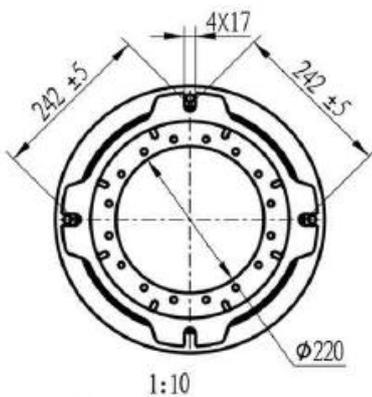

DESCRIPTION

ELMKF-CZT01 crane console mainly applies to control circuits of AC 50Hz(60Hz)rated voltage up to 380V(440V). It is used to control the start, speed-regulation, communication and brake of motors contained in crane machinery and similar electric control devices.

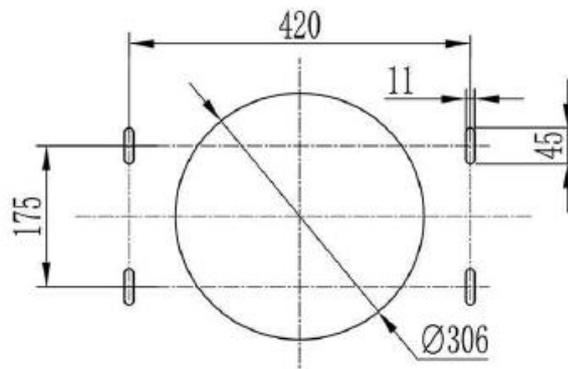

control box:

The control box is made of steel plate, and has a hinged cover with locking function(standard),which makes it easy to check and maintain.The layout of joystick, indicator and control is configured according to client's specification.
